

CometChat Internship Task – UI Kit Integration Assignment

Objective:

Integrate **CometChat's UI Kit** into a basic application using a programming language or framework of your choice.

Instructions:

1. **Visit the CometChat Website:**

Go to <https://www.cometchat.com>

2. **Navigate to the Documentation:**

- Go to **Developer > Integration > UI Kits > Documentation**
- Choose any one of the supported languages/frameworks for integration:
React, Angular, Vue, React Native, Swift (iOS), Java (Android), or Kotlin (Android)

3. **Sign up on CometChat:**

- Use a Gmail ID and append **+test** to it when signing up.
Example: If your email is pourav@gmail.com, sign up using pourav+test@gmail.com
- Applications using emails without **+test** will not be considered.

4. **Implement the UI Kit:**

- Create a basic application and integrate CometChat's UI Kit following the official documentation.
- You may use a sample app or a personal project for integration.

5. **Submission Requirements:**

- Share either:
 - A **GitHub link** to your project, OR
 - A **PDF** with:
 - Code snippets
 - Issues faced during implementation
 - How you resolved them
 - Screenshots of your successful integration
- Email your submission to:
 - **careers.intern@cometchat.com**

Notes:

- There is no time limit — we value your approach over speed.
- Incomplete tasks are acceptable if you document your thought process and issues encountered.
- Submissions without the required documentation or screenshots will not be evaluated.

We would greatly appreciate it if you could star the repository you're exploring and follow our organization, CometChat, on GitHub.
